Custom Home Automation Solutions

About Us

Integration Engineers is a low volt electrical contracting company that specializes in home, commercial, and healthcare automation systems. We design systems based on customers priorities and derive value by installing scalable and customizable automation solutions, all while creating a luxury experience that is virtually an invisible part of the built environment.

When you connect your space through integrated lighting, HVAC, audio, visual, and security systems your environment works for you. Your routines become simplified, time is given back to you, productivity is amplified.

We use multiple partners to build exactly what our customer wants.
These three companies are the backbone to our tiered bids.

With Wink, building a smart home is easier than ever before. Start with connected products from your favorite brands—including GE, Nest, Philips, and Schlage. Before you know it, your home will be doing things you never thought possible.

Headquartered in Harrison NY USA, Universal Remote Control, Inc. is a global leader in automation and control systems for residential and commercial applications. URC technology is respected worldwide for unsurpassed performance and reliability with over 100 million remote controls sold in the past ten years alone.

Crestron Electronics has carved the path for technological innovation since 1971. We create automation solutions that transform the way people live their lives, making their day-to-day tasks easier and improving efficiency and productivity. We strive to be at the forefront of cutting-edge technology, constantly offering faster, better solutions that address the needs of customers the world over.

We automate systems. Here is a breakdown of the major systems and what automation looks like.

TOUCH SCREENS & UNIVERSAL REMOTES

Customize displays make it easy to control your home from one simple place. Whether it's an iPad, smart phone, in wall screen, it's your choice! Use a universal remote to cut back on the number of controllers you need to keep track of.

AUDIO & VIDEO CONTROL

Audio & video controls make it easy to stream music, movies, games, and TV all from a universal remote or touch screen. Set up zoned audio to increase the number of areas that can enjoy quality sound or build the home theater of your dreams!

LIGHTING CONTROL

From motion sensors to intuitive touch screen controls you can create the setting you want. Control the lighting in your home to save energy, reduce worry when traveling, or create preset scenes or routines for convenience.

HVAC & SHADE CONTROL

From day one save on energy costs by installing a smart thermostat to track and trend energy costs. These systems learn routines, adjust to outdoor temperatures, and account for temperature fluctuation in homes with multiple floors by using temp sensors. Automated blinds help control temperatures and limit sun wear and tear on furniture and floors. Set routines and adjust easily when things change.

LOCKS & SECURITY

Secure your home with doorbell and perimeter cameras, door sensors, glass break sensors, remote door locks and more. Receive notifications when there is movement in or around your home or you can use a 3rd party to remotely monitor the system. Check the status of door locks from anywhere in the world or let your kids in when they get off school. Peace of mind is priceless.

VOICE CONTROL

Tie your Amazon Alexa, Google Home or other voice assistant into your system to easily process commands without having to lift a finger.

Home Automation Tiered Packages

TIER ONE

\$3,000 - \$6,999

Remote Door locks

Ring Video Doorbell

Smart Thermostat

Smart Lighting System

Sound System

Voice Control

Network

* Price may vary depending on
options selected

* Price may vary depending on
options selected

* Price may vary depending on
options selected

* Systems over \$25,000 are
completely custom and require
more advanced planning and
programming.

TIER 1

Prices range from \$3,000 to \$6,999

A tier one system uses Wink as its backbone. This package puts customization in the hands of the user. Using a compilation of IoT (Internet of Things) devices to create an affordable and expandable automated home.

System Highlights

- Affordable
- Easily Installed
- Connects to Your Current Wifi Network

*Pricing Includes Labor

TIER 2

Prices range from \$7,000 to \$29,999

A tier two system uses URC as its backbone. This technology relocates the equipment to a centralized location, making automation an invisible part of your home. The interface is easy to use and reliable on any device.

System Highlights

- Concealed
- Centralized Control
- Intuitive & Simple

*Pricing Includes Labor

TIER 3

Prices range from \$30,000 & Up

A tier three system uses Crestron as its backbone. With limitless possibilities we can design a home that enhances every aspect of your life. If you can dream it we can build it.

System Highlights

- Infinite Scalability & Customization
- State of the Art Control & Security
 - Industry Leader in Reliability

*Pricing Includes Labor

All of the systems and options presented can be upgraded or downgraded to fit the financial and/or home specific needs. The luxury of working with Integration Engineers is we are here to serve you, to build a relationship and design a system that fits your lifestyle.
